DETAILED ACTION

Information Disclosure Statement

1. If applicant wishes to have the submitted JP reference to be of record, an IDS should be submitted.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 2, 8, 10, 13, 14, 16 and 18 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The examiner cannot find basis in the specification for the recitation of

"at least one of a phosphoric acid compound that is not an organophosphoric acid compound at equal to or more than 0% but less than 0.2% and an organophosphoric acid compound at more than 0% but less than 0.01%, or at least one of the phosphoric acid compound that is not an organophosphoric compound at more than 0% but less than 0.2% and an organophosphoric acid compound at equal to or more than 0% but less than 0.01%".

Response to Arguments

4. Applicant's arguments filed July 24, 2006 have been fully considered but they are not persuasive. Applicant points to examples in the specification, notes that they meet

Art Unit: 1751

the limitations of the claims, and concludes that there is therefore basis for the claim language. This is not persuasive because the claim language is considerably broader than what is shown by the examples. There is nothing *explicitly* supporting such language as "phosphoric acid compound that is not an organophosphoric acid compound", the recited percentages or "at least one" language.

The rejections under 112, 2nd paragraph have been overcome by applicant's amendments, but this appears to be at the expense of complicating the 112 1st paragraph issues.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
